

# How much progress did the Bali climate talks make?

This score card rates the 'Bali Roadmap' against what Australian environment, development and faith groups identified as required from the Bali meeting, in order to get the world on track to prevent dangerous climate change. It also rates the Australian government position on the same criteria.

The Issue	The World	Australia
1. Keeping warming below 2 degrees	-	-
2. Set global emission reductions	**	**
3. Developed countries to take the lead on emissions reductions	***	****
4. Engaging developing countries	***	***
5. Support developing countries to deal with climate change	***	***
6. Share clean technology with developing countries	***	***
7. Reduce emissions by slowing deforestation	***	***
8. Conclude negotiations by 2009	*****	*****

\*Appalling \*\* Disappointing \*\*\* Acceptable \*\*\*\* Good \*\*\*\*\* Excellent

This Climate Action Network Australia document was prepared with the support of, Australia and New Zealand Solar Energy Society, Australian Conservation Foundation, Australian Youth Climate Coalition, Oxfam Australia, Sisters of the Good Samaritan, The Wilderness Society, Uniting Church, Victoria and Tasmania Synod, Justice and International Mission Unit, Greenpeace Australia Pacific.
